

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Indiana Gas-Former MGP
Applicant's Name:	Indiana Gas Company, Inc.
Site Location:	570 Pinckley Street Brazil Clay County
VRP Site Number:	6980703
Project Manager:	Bill Wieringa
Date Application Received:	July 10, 1998
Date Project Completed:	February 1, 2001
Project Duration:	2 years, 7 months
Contaminant Group(s):	BTEX, PAH's, Cyanide & Metals
Media Cleaned Up:	Surface and Subsurface Soils
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	This property shall remain Nonresidential

Project Description: The site entered the VRP in July of 1998. A portion of the property was used as a Manufactured Gas Plant (MGP) starting in 1901 using a coal carbonization process. The operation ended in 1926; after which it operated intermittently for 5-6 years. By 1946 most of the site structures were removed. The site has been used by the city of Brazil as a storage area (sand, gravel and asphalt supplies). The Indiana Gas Company finished the site characterization work where they determined the nature and extent of the contamination. Following the RWP approval, the site excavated out the CNTS area and replaced the contaminated soil with clean fill. VRP staff were present during the excavation process and split confirmation samples with the site. VRP deemed this site complete when the Remediation Completion Report was approved on February 1, 2001.
